

LP GAS IS A SAFE, CLEAN, INSTANT, PORTABLE AND AFFORDABLE ENERGY SOLUTION. HOWEVER, TO ENSURE YOUR SAFETY, ALWAYS BUY GAS FROM A FULLY COMPLIANT LP GAS DISTRIBUTOR THAT ONLY SELLS LEGALLY FILLED CYLINDERS.

Do Not Buy Illegally Refilled or Traded Gas Cylinders

Your safety - and that of your family and community - should never be compromised. Purchasing illegally refilled commercially branded gas cylinders from unauthorized sources is dangerous, irresponsible, and unlawful.

Did you know that you get legal and illegally filled cylinders:

- A safe and legally filled cylinder is a cylinder filled and distributed by a reputable and fully compliant distributor in terms of the SA Pressure Equipment Regulations and relevant legislation.
- An illegally filled cylinder is a cylinder filled and distributed by a distributor who are not fully compliant in terms of the SA Pressure Equipment Regulations and relevant legislation. They may may be compliant in some ways but are lacking full compliance as required by law which make the cylinders they fill illegal and unsafe to use.
