LP GAS IS A SAFE, CLEAN, INSTANT, PORTABLE AND AFFORDABLE ENERGY SOLUTION. HOWEVER, TO ENSURE YOUR SAFETY, ALWAYS BUY GAS FROM A FULLY COMPLIANT LP GAS DISTRIBUTOR THAT ONLY SELLS LEGALLY FILLED CYLINDERS.

Do Not Buy Illegally Refilled or Traded Gas Cylinders

Your safety - and that of your family and community - should never be compromised. Purchasing illegally refilled commercially branded gas cylinders from unauthorized sources is dangerous, irresponsible, and unlawful.

Privately Owned Cylinders

These cylinders are bought outright by individuals. Once purchased, you legally own the cylinder and are responsible for ensuring it is refilled safely and legally. However, only trained, compliant refillers using approved equipment should refill these. This include but is not limited to: Alva, Cadac, Megamaster, Safi Gas, etc.

Branded Company-Owned Cylinders

These belong to gas companies (e.g. Afrox, Easi-gas, Oryx, Totalgaz, EPG Gas, Wasaa, Bay Gas etc.). They are only rented or exchanged through the company's authorised network. These cylinders may only be filled by authorised personnel at legal refilling sites. Tampering with or refilling them without permission is illegal and dangerous
