

LP GAS IS A SAFE, CLEAN, INSTANT, PORTABLE AND AFFORDABLE ENERGY SOLUTION. HOWEVER, TO ENSURE YOUR SAFETY, ALWAYS BUY GAS FROM A FULLY COMPLIANT LP GAS DISTRIBUTOR THAT ONLY SELLS LEGALLY FILLED CYLINDERS.

Do Not Buy Illegally Refilled or Traded Gas Cylinders

Your safety - and that of your family and community - should never be compromised. Purchasing illegally refilled commercially branded gas cylinders from unauthorized sources is dangerous, irresponsible, and unlawful.

How to Identify a Safe and Compliant Gas Distributor

- Safe distributors follow legal requirements and industry best practices.
- They use trained staff and follow correct refilling procedures.
- They only supply legally filled commercially owned cylinders, sealed with branded plastic seals that matches the brand of the cylinder.
- They will issue detailed tax invoices or receipts containing all the details of the company.
- They operate from identifiable business premises approved by the Local Fire Department.
