

LP GAS IS A SAFE, CLEAN, INSTANT, PORTABLE AND AFFORDABLE ENERGY SOLUTION. HOWEVER, TO ENSURE YOUR SAFETY, ALWAYS BUY GAS FROM A FULLY COMPLIANT LP GAS DISTRIBUTOR THAT ONLY SELLS LEGALLY FILLED CYLINDERS.

Do Not Buy Illegally Refilled or Traded Gas Cylinders

Your safety - and that of your family and community - should never be compromised. Purchasing illegally refilled commercially branded gas cylinders from unauthorized sources is dangerous, irresponsible, and unlawful.

How to Identify a Non-compliant Gas Distributor

- You always receive different colour cylinders.
- The valve will be sealed with an unbranded plastic seal of different colours.
- They are much cheaper than legitimately filled cylinders, often because the cylinder is under filled and you get less gas than what you paid for.
- They provide generic documentation that is untraceable to avoid complications and accountability in terms of the cylinders supplied to you.
- The delivery truck will be loaded with all brands of cylinders.
